PROFESSIONAL SUMMARY

Detail-oriented software engineer with hands-on experience building modern web applications and cloud infrastructure. Proficient in React, Python, and AWS with strong foundation in data structures and algorithms. Well-versed in Agile methodologies and collaborative development. Seeking a position as a software engineer where I can apply my technical knowledge and contribute to innovative projects.

CORE SKILLS

Technical Skills: React & Redux, Python & Django, JavaScript/TypeScript, PostgreSQL & MongoDB, AWS (EC2, S3, Lambda), Docker & Kubernetes, Git & CI/CD

Soft Skills: Problem Solving, Team Collaboration, Technical Communication, Time Management, Adaptability, Attention to Detail

PROFESSIONAL EXPERIENCE

Software Engineering Intern

CloudScale Technologies • Seattle, WA • 06/2023 - Present

- Developed cloud-native applications using AWS Lambda and API Gateway, processing 12K+ daily events
- Built responsive frontend interfaces with React, improving user engagement by 35%
- Implemented automated deployment pipeline using Docker and GitHub Actions
- Collaborated with cross-functional team of 8 to deliver features on tight deadlines

PROJECTS

Web Application Development

Designed and developed responsive web applications using React and modern JavaScript. Implemented state management with Redux, routing with React Router, and styling with Tailwind CSS. Created reusable component library used across 3 projects.

Technologies: React, Redux, TypeScript, Tailwind CSS, Vite

Backend API Development

Built RESTful APIs using Python Django and Node.js Express. Implemented authentication, authorization, and data validation. Integrated third-party APIs including Stripe for payments and SendGrid for emails.

Technologies: Python, Django, Node.js, PostgreSQL, JWT

Cloud Infrastructure Management

Deployed and managed applications on AWS. Configured EC2 instances, S3 buckets, and RDS databases. Implemented auto-scaling and load balancing for high availability. Reduced infrastructure costs by 25% through optimization.

Technologies: AWS, Docker, Terraform, CloudWatch, Route53

Database Design and Optimization

Designed normalized database schemas for multiple applications. Implemented complex queries, stored procedures, and triggers. Optimized slow queries using indexing and query analysis, achieving 80% performance improvement.

Technologies: PostgreSQL, MongoDB, SQL, Database Design, Performance Tuning

EDUCATION

Bachelor of Science in Computer Science

University of Washington • Seattle, WA • 05/2023

CERTIFICATIONS

- AWS Certified Solutions Architect - Associate (2023)
- Professional Scrum Developer (PSD I) (2023)
